

As a general rule, we support and test devices on the newest OS and the previous version. Listed below are a full list for TV, Phone, Tablet, and web browser.

Please note that because Fire TV Stick Basic Edition (2016) is a supported device and runs Fire OS 5, we support a minimum of Android 5.1 Lollipop, API level 22 - targetSdkVersion "22". If bugs get reported on a non-Fire OS older than Android 8, the core client team will evaluate on a case-by-case basis.
