

Hosted Unified Communications Solutions for Business

We are a premier provider of Unified Communications and Collaboration solutions for business. We deliver a mobile, flexible and reliable HD voice and video solution seamlessly integrated with productivity applications to simplify communications and improve efficiency.

Best-in-Class Solution Portfolio

We have integrated many best-in-class options into one of the most advanced telecommunications platforms available. We give companies the power to effectively deliver their employee's communications choices with security, reliability and analytics.

VoIP

A tier 1 class network delivering best-in-class HD Voice

Collaboration

Collaborate across the room or across the world; instant messaging, desktop sharing, video chat and more

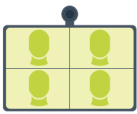

Mobility

Mobile and Bring Your Own Device solutions enable users to be effective wherever

Call Center

Scalable solution with advanced call queuing and detailed reporting

Video

Multiple video solutions across platforms for easy face-to-face communications

Email

Voice-enabled Hosted Microsoft Exchange delivers email to any device

Archive

FINRA and SEC compliant archiving of call recordings, emails and instant messages with advanced features

Access

Flexible Internet access options from Bring Your Own Bandwidth to the Full integration of MPLS in our data center

App Integration

Your phone system integrated with your CRM and productivity applications

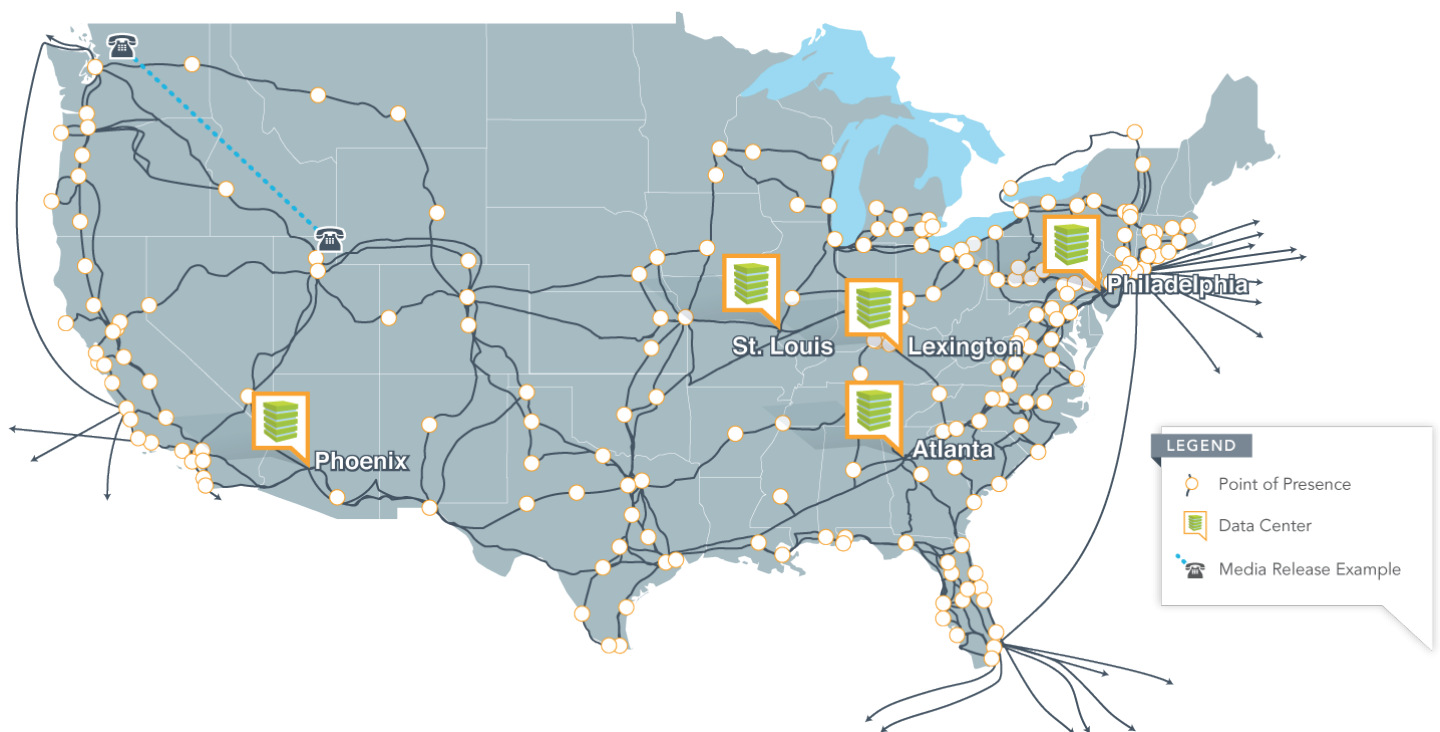

SIP Trunks

Our SIP trunks enable advanced UC features, mobility and app integration for a seamless multi-office solution

Best-in-Class Network Infrastructure

Our platform has multiple layers of redundancy enabling maximum uptime and continuous operation. To dramatically reduce latency and offer network flexibility, we offer Points of Presence on a worldwide fiber backbone and use Media Release to allow the voice component of each call (RTP) to travel directly from phone to phone without passing through our data center.

Benefits

Business Continuity

Never miss a call; your business communications continuity plan is done

Analytics

Analyze your business communications; gain deeper insight into operational efficiencies

Diversified Workforce

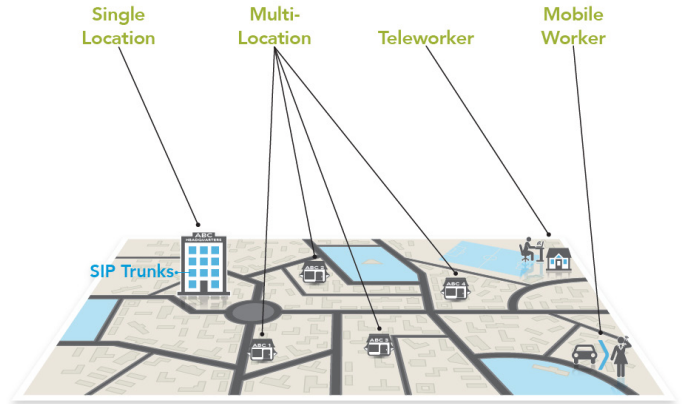

Reach anyone in seconds; A single phone system to unite all offices and employees

Scalability

Only pay for what you need; grow or reduce as your business needs change

Customized Implementation

We have the ability and experience to do custom deployments, tailoring our solution to maximize quality on your network and LAN environment.

Best-In-Class Customer Experience

Daily Experience

As your provider, we can integrate a world-class communication solution with multiple systems into existing business productivity software to take advantage of time-saving applications and services.
