MANAGED SECURE INTERNET

Why Your Business Needs MANAGED SECURE INTERNET

DO YOU KNOW WHAT YOUR EMPLOYEES ARE DOING ONLINE AT WORK?

Internet misuse at work is costing American companies more than **\$85 billion** annually in lost productivity.

70% of employees spend one to two hours a day on social networking sites. That's about 400 hours per year.

44% of employees actively use streaming media at work which consumes large amounts of bandwidth and can block legitimate business-related traffic.

80% of companies report that employees have abused Internet privileges, such as downloading pornography or pirated software while on the clock.

IS YOUR BUSINESS A CYBERATTACK TARGET?

Cyber threats are rated as one of the **top five global risks** according to the latest World Economic Forum Global Risk Report.

62% of all data breaches were at the Small Business level. If you think your business is too small to be an attractive target for cyber criminals, or you don't have anything worth stealing, think again. Small Businesses are more attractive targets because they tend to be less secure and because automation allows modern cyber criminals to easily mass produce attacks with little time or investment on their part.

CAN YOU AFFORD THE CONSEQUENCES OF A CYBERATTACK?

77% of Small Business owners say their company is safe from cyberattacks, but **83%** have no formal cybersecurity plan in place.

In 2014 small firms cut Internet security spending by **20%**, while mid to large sized businesses increased Internet security spending by **64%**.

88% of small business owners say their monthly coffee budget is larger, (about \$30 per employee) than their Internet security spending.

60% of small businesses go out of business within six months of being hit with a data attack. When a large company endures an embarrassing and costly data breach, it will suffer financial losses and damage to its reputation. When a small company is attacked, it may never recover.

Vexus Managed Secure Internet services offer you a better choice in business security. To learn more about Vexus and how we can help your business succeed, call 800-658-2150.
